

TRAVERTINE

Decorative wall coating plaster for interiors and exteriors with travertine effect

Description	TRAVERTINE is a decorative coating ideal to obtain the typical unique appearance of the original travertine limestone. It is based on pure lime putty, natural colouring earths, special additives, selected marble sands and powders that enhance the product characteristics; TRAVERTINE has a high substrate adhesion and good breathability properties. Prior to the proper substrate preparation, TRAVERTINE can be applied both on any interior wall surfaces, even if already painted with synthetic paints or coatings, and it can also be used for exterior installation.
Consumption rate	2,0 – 2,2 Kg/m² per coat
Interiors / Exteriors	Interiors and Exteriors
